CF EVANS TENURE

2012 - Present

Bobby Washington is a Front End Superintendent with more than 40 years of construction experience across residential and commercial work. He owned and operated his own company for over 26 years and spent time with Ridenhour Concrete of Jacksonville before joining CF Evans, where he has progressed from Assistant Superintendent to Field Superintendent to his current role. Bobby specializes in underground utilities and all phases of concrete, the work that sets the foundation for everything that follows, and he oversees the schedule and crews on site through those critical early stages. Four decades in the field have given him a deep well of experience to draw from, and he is a steady resource for the superintendents and project teams who work alongside him.

Key Responsibilities:

- Oversee the daily work schedule and direct crews on site through the front end phases of construction
- Manage underground utility installation, coordinating trades and verifying work meets plans before backfill
- Lead all concrete phases, from footings and foundations through slabs and flatwork
- Set the pace and quality standard early in the project, keeping downstream trades on schedule

Project Examples:

- Magnolia Block — Spartanburg, SC | 175 Units
- Woven — Greenville, SC | 214 Units
- Brooking Square — Charleston, SC | 348 Units
- The Henslow — Charleston, SC | 175 Units
- Ellison at The Preserve — Asheville, NC | 315 Units
