CF EVANS TENURE

2020-Present

CF EVANS CONSTRUCTION

As QA/QC Manager, David leads the implementation of the CF Evans quality control program, managing water intrusion risk across each project by reviewing plans, identifying design deficiencies, and checking work in the field. He coordinates with architects, consultants, manufacturers, and subcontractors to work through design details and mock-ups proactively, and develops company quality standards that result in durable, dry buildings for our clients. He brings 23 years of construction experience across residential construction and design, manufacturer representation, consulting, and multifamily

On Your Project, David:

- Implements the CF Evans quality control program across every phase of inspection
- Provides specialized building-envelope review of systems, materials, and installation
- Verifies the work meets or exceeds the project's contractual requirements

Project Examples:

- The Wyre River Arts- Asheville, NC | 237 Units
- 408 Jackson - Greenville, SC | 227 Units
- Ellison at the Preserve - Asheville, NC | 315 Units
- Morrison Yard - Charleston, SC | 380 Units
- Newbrook - Charleston, SC | 264 Units

My Promise: "We will proactively look for quality risks before they become warranty problems."
