CF EVANS CONSTRUCTION

Your Business Manager for the Project

As Project Manager, Jason manages the business side of the project from preconstruction through completion: subcontractor selection and contract negotiation, project schedules, cost and financial forecasting, and quality throughout every phase. He directs project documentation, including RFIs, submittals, pay applications, and shop drawings, and keeps owners, architects, engineers, and consultants aligned through proactive communication. His job is not simply to report what happened, but to anticipate what needs to happen next.

On Your Project, Jason:

- Manages budget, financial forecasting, and change management
- Leads subcontractor selection, scope review, and contract negotiation
- Builds and maintains the project schedule
- Directs project documentation, including RFIs, submittals, and pay applications
- Coordinates closely with owners, architects, engineers, and consultants

Project Examples:

- Brooking Square — Charleston, SC | 348 Units
- The Henslow — Charleston, SC | 163 Units
- Cooper River Farms II — Charleston, SC | 72 Units
- Flora Carnes Crossroads — Summerville, SC | 290 Units

My Promise: *"You should always know where your project stands, and when we see an issue coming, you will hear it from us early."*
